BIOMETRIC SERVER

TBS BIOMANAGER

TBS BIOMANAGER & CLOUD is the professional software package to manage your biometric installation on enterprise level. It features a flexible and expandable package structure, with the base package fulfilling all basic needs and the power packages adding extended functionality.

Your additional benefits:

- **SECURITY** - Protect all your important data in rest and transit, by utilising the advanced built-in security mechanism.
- **INTEGRATION** - Combine our biometric solution with other systems, by using flexible software interfaces and modules for a seamless integration.
- **SCALABILITY** - Let the system grow by expanding to multiple sites and large user groups, without compromising performance.
- Multi-language support

OPTIONS & PLANS

BIOMANAGER is intended for on-premise and cloud installations. It offers a **Base Package** and up to ten **Power Packages**.

The **Base Package** provides all the functionalities needed to manage a biometric system and includes access to the public REST API for integration.

The **Power Packages** are extensions adding specific functionality depending on your requirements.

You may choose between a **Subscription** plan or a **One-Time** License. Certain functionalities are only available for subscription.
